Screen Image Background Maker ................................................35
1. Overview

WPS Adapter is a must-have device for your meeting room! It turns your existing "wired" projector into a "high-end wireless" projector. With the revolutionary Plug-and-Show wireless projection features, WPS makes every one of your presentations and meetings efficient and successful.

- High Performance Wireless Projection

With the revolutionary high performance wireless projection, you can easily share the multimedia on the big monitor with friends without cable hassle.

- High Performance Wireless Projection & Audio Projection

With the revolutionary high performance wireless projection with audio, you can easily share the multimedia on the big monitor with friends without cable hassle.

- Easy installation

Download the software from web management page directly, or make a “Plug & Show” token to project wirelessly right away.

- Plug & Show

There is an easy tool to make a Plug & Show USB Token on UI menu. Just link your PC/Laptop to the WPS Adapter (through WLAN or Ethernet), plug the token into a USB port, and in seconds, your screen will be wireless projected to the connected projector!

- Macintosh (Mac) wireless Projection

WPS Adapter supports Mac client connected and projected wirelessly. By launching the Mac client software which can be downloaded from the web management page, WPS provide the same experience to Mac user to utilize the wireless presentation feature.

- 4-to-1 Split Screen Projection
With this 4-to-1 split screen feature, up to four PC screens can be projected to one projector in the same time. Thus you can easily do side-by-side comparison from four PC / PDAs to increase meeting productivity!

- Smartphone wireless projection

WPS Adapter supports MobiShow function for windows mobile 5/6 system. By launching MobiShow utility, MobiShow brings your mobile screen to big screen and which can play photos and PtG files stored in your mobile phone for presentation.

- Change Standby Screen

You can use the application “Screen Image Background Maker” to change the Splash Screen. Design the image with message you would like to present, upload it through web control page, and you could have customized starting page.

- AP Client Mode

You can enable the AP-Client Mode function to let the WPS Adapter join the existing Access Point through WiFi. This feature provides the flexibility of wireless network deployment in enterprise environment.

- Support PoVGA

Connect WPS Adapter to a projector supporting PoVGA, the power can be supplied directly from the VGA port without external power adapter.
Features

- Support Windows Win7, Vista, XP.
- Support Macintosh (Mac) version 10.5 and above.
- 4-to-1 split screen projection! Turn one projector into four, increase meeting productivity right away.
- Smartphone wireless projection! PC-less stylish presentation becomes possible!
- Provide session security login, wireless WEP/WPA key and Gatekeeper function to protect presentation contents and keep good security to office networks.
- Support High Performance screen projection
- Changeable Splash Screen image!
- SNMP Manager! To manage the devices easily
- AP-Client Mode! Deploy wireless network in enterprise environment easily
- Support PoVGA.

2. Quick Start

1) Plug the WPS Adapter into projector VGA port, and turn on the projectors power to use.

2) Turn on the WPS Adapter.
   - When Projector shows the default menu on the screen as below, it
indicates the WPS Adapter is ready.

3) Make sure your PC WLAN is enabled already, and connect your PC with the WPS Adapter.

4) Open your browser and enter the IP address to access the WPS Adapter web home page.
   ♦ The default IP address of WPS Adapter is **192.168.100.10** or refers to the IP address shown on the left corner of projector screen.

5) Download the client software. Please select the” Win7 / Windows Vista / XP ” or ”MAC” and execute the installation program.
   After installing the program, you will see the WPS shortcut on the PC screen.
6) Make sure your personal firewall allows the WPS software to pass through.
7) Select device that you want to projection

8) Enter the **LOGIN CODE**, you can see the login code on the projector screen.
9) Click the “Play” button to start projection!

3. Windows Client Utility

3.1 Starting Program

After you download the WPS Windows program via web page successfully, then follow below steps to start.
1) Click WPS icon to execute the program.

2) Program start to search for WPS Adapter automatically,
3) If the WPS Adapter is found then “Login Code” dialog box will pop up on the PC screen.
• Searching for WPS Adapter

![Searching for WPS Adapter](image)

• Once WPS Adapter is found, enter login code to start.

![Login Code Dialog](image)

3.2 Login

1) After “Login Code” dialog shown, enter login code to start presentation.
2) You can see the login code shown on the projector screen.
3.3 Main User Interface

Control Area for Screen Projection Feature

Menu Area

Status Indicator

Speedy mode

3.4 Screen Projection

Click the “Play” button for full or split screen, you can project the main screen on to the display immediately, click the “Pause” button, you can freeze you projection screen, click the “Stop” button to stop projecting your screen, by clicking speedy mode button, the projection will enter speedy mode for faster projection.

* 4-1 function will be disabled in speedy mode.
* To enable audio projection, you have to install provided audio driver first.

3.5 Menu Description

3.5.1 Show Login Code

Click “Show Login Code”, it will display the login code on the right-upper of desktop and close it automatically after 10 seconds. You can also click on the area to close this window manually.
3.5.2 Open Admin Web Page

Click \(\text{Web Admin}...\) to open function menu and select “Web Admin” management web page. The web page detailed functions will be described on next chapter.

3.5.3 Searching Server

Click “Search Server” to re-search the WPS Adapter again.
3.5.4 Projection Quality

Click the “Projection Quality”, you can select to project the Normal or Best for projection wording quality,

3.5.5 Projection Source

Click the “Projection Source”, you can select to project the main screen of desktop or the virtual extended screen.

P.S: Virtual Extended Screen option
You need to install “VDD.exe” driver first which is stored in the USB token.

Note: Unsupported Win7 starter.
3.5.6 Quick connection

Click “Quick connection” to enable connect the last connection directly.

3.5.7 Auto WiFi Connect

Click “Auto WiFi Connect” to enable the auto WiFi discovery and connection function for quick wireless set up.
3.5.8  Auto Power Manager

To make the highest projection performance, application will turn the PC’s windows power scheme from current settings to “highest performance”, however, you can click the “Auto Power Manager” to enable or disable this function and restore you power scheme immediately.

3.5.9  Hide UI

Click the “Hide UI”, you can choose to hide or display the application control panel from projection screen.
**3.5.10 Advanced Screen Capture**

Click the “Advanced Screen Capture”, you will be able to see tip windows and other layered windows (include the main UI) on the connected display. However, the mouse cursor may blink from time to time when you are projecting your PC screen!
3.5.11 Make WPS Token

Click “Make WPS Token” to make a USB WPS Token, you can insert a USB thumb drive and follow the wizard to make the Token.
3.5.12 Copy Application to desktop

Click the “Copy Application to desktop”, it will copy the application to your desktop immediately even you don’t have the system privilege.

3.5.13 Hot Key

Click “Hot Key” to show Hot Key guide. You can use hot key to control the projection by keyboard.

Hot Key

- Full Screen: Ctrl + Shift + F
- Split #1: Ctrl + Shift + 1
- Split #2: Ctrl + Shift + 2
- Split #3: Ctrl + Shift + 3
- Split #4: Ctrl + Shift + 4
- Stop: Ctrl + Shift + S
- Pause: Ctrl + Shift + P
- Menu: Ctrl + Shift + M
- Speedy mode: Ctrl + Shift + T
3.5.14  About

Click “About” to show system information. It includes product model name, Client version, IP address and other information.

3.5.15  Exit

Click “Exit” to exit this application. It will stop current playing status and close the application immediate.
4. Mac Client Utility

4.1 Launch Application

1) Enable your WiFi and connect to WPS Adapter.
2) Execute WPS client software for Mac.

3) Launch WPS software and enter the login code.
4) Start Projection.

4.2 Main User Interface

4.3 Screen Projection

Click the “Play” button for full or split screen, you can project the main screen on to the display immediately, click the “Pause” button, you can freeze your projection
screen, and click the “Stop” button to stop projecting your screen.

5. Web Management

5.1 Home Page

1. Make sure your PC connects to WPS Adapter successfully.
2. Open your browser; it will enter the WPS home page automatically.
3. If not, enter your IP address on the browser, you can see the IP on the projector screen.
4. The default IP is 192.168.100.10

5.2 Download Software

1. Select “Download software” function.
2. Please select the “Win 7 / Windows Vista / XP” or “Windows Mobile 5/6” or “Mac Utility” and execute the installation program.
3. Follow Installation Wizard instructions to proceed until the installation process complete.
4. If pop up “Windows Security Alert” because Windows firewall block this program. You just press “Unblock” button to continue installation.
5. Once installation complete, a utility shortcut come out on the screen.
5.3 Login Web Admin

1. Click [Admin] and then enter password to login web page.
2. The password default value is “admin”.

![Login Web Admin](image.png)
5.3.1 System Status

Click [System Status], shows current system status.

**Model Name**: Product model name

**Versions**:
1. **Firmware version no.**: Product firmware version number.

**Network Status**:
1. **IP address**: IP address of WPS device.
2. **Subnet Mask**: subnet mask
3. **Default Gateway**: default gateway
4. **Wireless MAC address**: wireless MAC address
5. **Wire MAC address**: wire MAC address

**Connection Status**:
1. **Projecting status**: which is "Waiting for projecting" or "Projecting"
2. **Total Users**: This shows how many users are logged into WPS adapter.
5.3.2 Network Setup

There are many kinds of operating configurations as below.

<Auto-Configuration Network Setup>
The default setting of the WPS Adapter is DHCP client. When the WPS Adapter is connected to a LAN that already has a DHCP server present, the WPS Adapter takes an IP address assigned to it by the server. When the WPS Adapter is connected to a LAN that does not have a DHCP server, the WPS adapter becomes the DHCP server in the network.

<IP Setup>
- You can select "obtain IP address automatically" or "Use the following IP address"
IP Address: The default value is 192.168.100.10.
Subnet Mask: The default value is 255.255.255.0
Default Gateway: The default value is 192.168.100.10
DNS Server: The default value is 192.168.100.10

<DHCP Server Setup>
- You can select “auto(Enable/Disable DHCP Server” or “Disable”)
- Start IP: The start IP address of DHCP Server.
- End IP: The end IP address of DHCP Server
- Subnet Mask: The default value is 255.255.255.0
- Default Gateway: The default value is 192.168.100.10
- DNS Server: The default value is 192.168.100.10

<Wireless Setup>
- Wireless LAN: The default value is “Enable”.
- Embedded AP SSID: SSID string ,max. Length is 32 bytes.
- Connect to Existing AP: This is “AP client” mode feature. By this feature you can join others Access Point via wireless.
  First, enter the existing AP’s SSID and require security key in “Existing AP SSID” and “Key”, then reboot your system. After these steps, WPS will connect to this AP by wireless automatically.
  Note: The default value of AP client mode is “Disable”, and LAN function will be disabled during AP client mode.
- Region: default value is “Worldwide”.
- SSID Broadcast: The default value is “Enable”
- Channel: to set fixed channel or Auto. The “Auto” means after power on WPS, it will scan all of wireless channel and select clear one channel automatically.
- Encryption: you can select “Disable” or one of WEP/WPA/WPA2 64bit or 128bit in ASCII or HEX string.
- Key: If Encryption is enabled, you have to set key value according to the encryption mode you selected.

<Apply>: press button to select this mode.
<Cancel>: press button to abort action.
<Back>: Back to Operating mode main menu.
5.3.3 OSD Setup

Click [OSD Setup] button, to change OSD standby image.

- **<Restore Initial>:** Restore to default OSD standby image.
- **<Image File Upload>:** Upload the customized OSD standby image. (You need to convert the image to system defined format using provided IB Maker utility which is stored in the USB token.)

Click [Screen information] button, to change OSD information display.

- **<Disable>:** only login code (if it has)
- **<Enable>:** all information, login code, IP, SSID, Resolution, Channel, Version, Security
- **<Some Information>:** IP, SSID
5.3.4 Projection Setup

Click [Projection Setup] button

- **<Resolution>:**
  VGA: XGA(1024*768), WXGA(1280x800), WXGA (1280*768) and SVGA(800*600). The default value is XGA.

- **<Login Code>:** You can select “Disable”, “Random”, or “Use the following code” to set a specified 4-characters Number.

- **<Apply>:** Confirmation and Save modifications

- **<Cancel>:** Cancel all the modifications
5.3.5 Change Passwords

Click [Change Password] button, to change password value. The length of password is up to 8 characters.

- **<Enter New Password>**: enter new password you want to change for each category.
- **<Confirm New Password>**: double confirm new password.
- **<Apply>**: Confirmation and Save modifications.

5.3.6 Reset to Default
Click [Reset to Default] button to restore factory default settings.

*<Apply>*: Confirmation and action.

### 5.3.7 Firmware Upgrade

Click [Firmware Upgrade] button to upgrade firmware.

1. Firstly, you have to get latest firmware image file from your vendor.
2. Click <Browse> to specify file name you want to upgrade.
3. Click <Upgrade> to start.
4. A warning message shown and count down counter on the screen.
5. After a few minutes, a completed message is shown on the screen.
6. Restart WPS dongle to take effect.
**Warning:** Don’t power off WPS Adapter while firmware upgrade in progress, otherwise will cause your Adapter to stop working and will need to be returned to your vendor for firmware updating.

### 5.3.8 Reboot System

Click **[Reboot System]** button, to restart system

- **<Reboot>**: reboot system automatically.
5.3.9 Logout
6. Appendix

Screen Image Background Maker

Quick Installation Guide

Version: 1.00
1) Run the “Screen Image Background Maker” and follow the wizard to convert the image file.

2) Press “Open” to select a file to convert this image for background use.

3) Press “Saver” to save this file (*.ib)
4) Please connect to WPS webpage, and then connect to OSD setup page.

5) Press “Browser” to choose the *.ib file.
6) Press “image file upload” to upload your background image. Then it will show the message as below.

![Image File Upload](image)

**Note:** You may find “Screen Image Background Maker” in the USB Token.
