Optoma Expands Its Range of DLP Projectors for Installation Market

High-end projector approved for 24/7 operation

London, 23rd March 2009 – Optoma has expanded its range of projectors for the professional installation market with the launch today of the high specification EP783L, which provides a powerful long throw lens to suit rooms of any size. Boasting an exceptional throw ratio of 2.9 – 5.5:1 from its centre lens design, the EP783L is ideal for conference rooms, auditoriums and other large venues. The projector has also been approved for continuous operation 24 hours a day 7 days a week*.

With an impressive 5,000 ANSI lumens and XGA native resolution, the new EP783L produces high quality, bright images. The unit is also incredibly easy to set up, with powered zoom and focus, along with motorised Full Lens Shift functionality to adjust the lens both horizontally and vertically without moving the projector.

The EP783L projector comes with the Optoma five year colour performance guarantee and five year imager guarantee, for long-term picture performance. The filter free design also eliminates the need for ongoing maintenance, as filters do not need to be cleaned or replaced.

Other features include:

- Optional wireless module
- Built-in 10W speakers for an integrated audio solution
- Wide variety of computer and video input signals including HDMI, 5BNC, DVI and VGA-SCART
- RJ45 control and monitoring
- 24/7 operation*

Optoma's range of professional installation projectors also include the EP783S, launched in February 2009, which also comes with guaranteed 24/7 operation*. For more information about the range or for product specification sheets, visit www.optoma.co.uk.
